

OSC Rentals LLC's **Automated Frac Fueling Service** delivers fuel directly to diesel powered equipment in a safe, efficient, and cost-effective manner. Our Smart Machine Technology replaces the need to have fuel trucks and refuelers in the **HOT ZONE**.

HOT FUELING - Continuous fracking poses a dangerous environment for fuel trucks and multiple fuel workers who pull hoses to fuel equipment operating at extreme high temperatures.

SOLUTION – Through the use of Smart Machine Technology, OSC is able to safely eliminate the need of multiple fuel trucks and fuelers to work in the HOT ZONE. This transformation improves the overall SAFETY of the fracking operation and provides savings to the frac operator.

SMART MACHINE TECHNOLOGY

– replaces the fuel cap with Smart Sensors connecting the fuel tank directly to the Operation's Automation System. The Smart Sensors relay fuel levels and meters the fuel used per unit and per frac stage.

BENEFITS TO OUR CUSTOMERS

– savings include the reduction in non-productive time, manpower to operate the fueling process, and increased safety from eliminating the need for multiple workers fueling in the HOT ZONE.

THE OSC RENTALS, LLC. DIFFERENCE

- ☐ SMART MACHINE TECHNOLOGY
- ☐ 21,000GL fuel capacity (clear & dyed fuels)
- ☐ 24 reels of 426 feet of continuous dispensing hose
- ☐ 20 KVA genset onboard
- ☐ Double walled fuel tank & containment
- ☐ Each truck independently metered & recorded
- ☐ Level monitoring of supply tank
- ☐ Mechanical Shutoff valve in each dispensing nozzle
- ☐ Reports for fuel used by each unit and by each stage.
- ☐ SAFE Frac refueling operation
