

Transform Your Flowback Operations

The Sand Cat Total Clean Flow Back System represents a breakthrough in sand management technology. Our innovative system delivers unmatched efficiency in recovering and processing frac sand, while significantly reducing operational costs and environmental impact.

Superior Performance

- 100% sand removal capability
- Paint filter test compliance
- Advanced three-stage oil recovery
- Patented shaftless auger technology
- Revolutionary V-Tank design

Engineered for Efficiency

- 2-hour setup with forklift
- Compact footprint
- Reduced frac tank requirements
- No vacuum trucks needed
- VFD-controlled operation

FRAC SAND RECOVERY TECHNOLOGY

Transforming Flow Back Operations with
Advanced Sand Management

SANDCAT™
FLOWBACK SYSTEM

OPERATIONAL ADVANTAGES

Smart Water Management

- Continuous water recycling during operations
- Reduced water hauling costs
- Minimized disposal expenses
- Enhanced environmental compliance

Advanced Control Systems

- Climate-controlled operations center
- Sophisticated VFD controls
- State-of-the-art electrical systems
- Real-time performance monitoring

Quality Assurance

- Premium sand recovery
- Consistent fluid cleanliness
- Superior maintenance standards
- Reliable performance

SAFETY AND OPERATIONAL EXCELLENCE

The Sand Cat advantage includes our commitment to operational excellence through standardized procedures and highly qualified personnel. Each system is operated by certified technicians who follow strict protocols to ensure consistent performance and workplace safety. Our comprehensive training program covers equipment operation, maintenance procedures, emergency response, and environmental compliance, ensuring reliable and safe operations across all locations.

MOBILIZATION & DEPLOYMENT

Our mobilization process begins with a detailed pre-work scope analysis to ensure smooth operations from start to finish.

The Sand Cat system's trailer-mounted design allows for efficient transport to and from job sites, while our experienced logistics team handles all aspects of equipment movement, setup, and positioning.

Pre-Job Planning

- Comprehensive site assessment
- Access route verification
- Equipment positioning strategy
- Utility requirements evaluation
- Environmental compliance review

SEAMLESS MOBILIZATION & DEPLOYMENT

SandCat™
FLOWBACK SYSTEM

LEADING THE FUTURE OF FRAC SAND RECOVERY

Our custom fleet of Sand Cat systems feature cutting edge-flow back gas busters with integrated flaring capability, providing immediate visual confirmation of surface returns.

INNOVATIVE DESIGN MEETS OPERATIONAL EXCELLENCE
